

UNPARALLELED BENEFITS OF THE TERRASAN SYSTEM

- ◆ Features a small footprint and flexible, modular design
- ◆ Requires minimal retention time
- ◆ Effective treatment without the use of traditional bioreactors
- ◆ Ensures consistent effluent quality
- ◆ Requires minimal operator interface and service time
- ◆ Readily adaptable for a variety of treatment objectives
- ◆ Remote monitoring

TerraSan® Advanced Wastewater Treatment

TerraSan® represents a breakthrough in advanced technology for wastewater treatment. The systems utilize no traditional biological treatment; relying on advanced coarse solids separation, coagulation, flotation and oxidation techniques for solids removal, BOD reduction, disinfection and treatment. A variety of innovative polishing options eliminates or minimizes reliance on membranes.

TerraSan® System and Modules for Wastewater Treatment

Systems available for:

- ◆ Industrial wastewater treatment & reuse
- ◆ Food processing wastewater
- ◆ Landfill leachate
- ◆ Sewer mining / reclamation
- ◆ Site-specific wastewater treatment
